To whom it may concern:

Our relationship with Trellis Steel Construction, Ltd. began in 1995 and continues today. Trellis has performed steel building erection services for Span on dozens of projects ranging from 150,000SF up to 600,000SF in size. The projects were located coast to coast in the continental U.S. and throughout Canada. Trellis always exhibited a high level of competence and integrity during the execution of the projects.

I would not hesitate to recommend Trellis for erection services related to any commercial or industrial steel building project.

Please feel free to contact me if you require further information or require a verbal recommendation.

Respectfully submitted,

George Goddard
President
